

# A Global Pharma Company into formulations

## About Client

Company is a comprehensive drug product development and manufacturing services to the pharmaceutical industry. Their services include formulation, analytical and process development; clinical trial material and commercial product manufacturing and packaging; and stability storage.

## Opportunity/ Problem Statement

- The Manual documentation and reporting carved in to them to explore ERP solutions to integrate their business process and help them in regulatory compliance and reporting
- Have One single source of database system for their varied business processes
- As they were handling multiple projects (R&D & Capex) they were in a look out for a robust system to manage these processes and give them day to day visibility and insights .

## Solution

- Implementation of S/4HANA Enterprise Management 1511 FSP 02 , across Finance ,Logistics ,Planning and Manufacturing along with Project systems (for R&D and Capex Projects and Plant Maintenance Module
- Computer System Validation was embedded in the project implementation (Proactive System Validation)
- SAP-LIMS integration for transitional flow of inspection lots to LIMS system, and usage decisions being transferred back from LIMS to the SAP system

## Benefits

- Integrated Warehouse Management for the Raw Materials and Packaging materials for identification and tracking .
- R&D Projects (Project initiation ,monitoring ,cost and budgets ) though SAP PS Module
- Capex handing (Projects ,tracking ,costs budgets and analysis)
- Effective integration with LIMS for the Quality processes
- Faster and effective Financial closing cycle and seamless Financial transactions and consolidated Management
